Subject: Application for Angular

Dear Hiring Manager,

I am writing to express my interest in the Angular / Full Stack Developer position at your organization. With over 3.7 years of experience in building scalable and high-performance web applications using Angular (v12–v18), .NET 6/8, and RESTful APIs, I have consistently delivered robust solutions that improve performance, user engagement, and system reliability.

Currently working as a Software Engineer at Magnaquest Technology, I have expanded Angular-based SPAs, improving user engagement by 20% through enhanced UI/UX and responsive design. I have integrated 15+ RESTful APIs, reduced data discrepancies by 30%, and improved application load times by 40% using deferred module initialization and performance optimization techniques. My hands-on experience with RxJS, NgRx, lazy loading, and modular architecture has helped deliver scalable enterprise-grade applications.

Previously at Tata Business Hub, I worked on full-stack solutions using Angular 18 and .NET 8, where I enhanced system performance, implemented OAuth 2.0 authentication with Azure and JWT, and achieved 90% unit test coverage. I also optimized backend processes by eliminating SSIS dependencies and replacing them with API-driven solutions, improving efficiency by 80%.

My technical expertise includes:

- Frontend: Angular (v12–v18), TypeScript, RxJS, NgRx, Bootstrap, Angular Material
- Backend: .NET Core, ASP.NET Web API, Entity Framework
- Databases: SQL Server, PostgreSQL, Oracle
- Tools & Practices: Git, AWS, Agile/Scrum, Unit Testing (Karma/Jasmine)

I am passionate about writing clean, maintainable code and collaborating with cross-functional teams to build impactful solutions. I am confident that my strong frontend expertise combined with backend knowledge will allow me to contribute effectively to your team.

I would welcome the opportunity to further discuss how my skills and experience align with your requirements. Thank you for your time and consideration.

Sincerely,
MD Shahbaz
